

majors in minutes

TUESDAY, OCTOBER 20TH

7PM-8:30PM

MAUCKER UNION BALLROOM

What is Majors in Minutes?

Majors in Minutes is a speed-dating approach to learning more about majors or careers of interest to you. At this event, you, or a group of students, interested in a major will visit with Junior or Senior students in that major for five minutes. After five minutes, you can remain at that station or move to another station of your choosing. You can visit as many stations as you like or as few as you like!

When is the event?

Don't miss this opportunity! The event is being held **Tuesday, October 20th, 2009** in the **Maucker Union Ballroom** from 7-8:30pm.

Who will be there?

Hopefully, you and your friends! Junior and Senior students from the various majors will be there to share their experiences or answer your questions regarding a major. This is purely a **student to student** event. Talk to your RA or PAIR, grab a couple of friends and join us that night!

Majors in attendance:

Accounting	Anthropology	Art
Athletic Training	Biology	Chemistry
Communications	Comm: E Media	Comm: Public Relations
Comm Disorders	Computer Science	Construction Management
Criminology	Earth Science	Economics
EET	Elementary Ed	English
Family Services	Finance	Geography

Modern Languages	Movement and Ex Sci	Music
Philosophy	PE Teaching	Physics
Political Science	Psychology	Public Administration
Real Estate	Religion	Social Science Teaching
Social Work	Sociology	TESOL
Textile and Apparel	Theatre	

Where is the event?

Majors in Minutes will be hosted in the **Maucker Union Ballroom, Tuesday, October 20th from 7-8:30 pm.** See the following link for a map of the campus <http://www.uni.edu/infosys/campusmap/>.

Do I need to bring anything?

Just bring any questions that you would like to have answered and a friend. After the event, you will have the option to sign up for further information on your major “matches.”

Wondering what to ask...Here are some starter questions for you!

- What do you study in (insert major here)?
- How did you get involved in this major?
- What are the different jobs/careers in this major?
- What surprised you about the major?
- What types of classes do you take? What classes would you suggest I take to learn more about the major?
- Are there skills or experiences I should have if I am thinking about the major?
- What do you like the most about this major? What do you like the least?
- Are there opportunities for internships or field experiences in the major? What are some examples of things I could do?
- Would you recommend getting involved in campus organizations? If so, which ones?
- Anything else you want to learn!
