

Contents

Foreword	xi
<i>Henry M. Levin</i>	
Preface	xiii
The Goals of This Book	xiv
Who This Book Is For	xv
What This Book Is Not	xv
Overview of the Contents	xvi
A Few Words of Explanation	xvii
Acknowledgments	xviii
About the Authors	xxi
1. Asking the Right Questions	1
What Is <i>Our</i> Approach to Making Sense of Research?	2
Five Questions About Research	3
The Causal Question: Does It Work?	5
The Process Question: How Does It Work?	8
The Cost Question: Is It Worthwhile?	9
The Usability Question: Will It Work for Me?	10
The Evaluation Question: Is It Working for Me?	11
Four Case Studies of Education Research	12
Class Size Reduction: Does Size Matter?	13
Phonics: Can It Teach Them All to Read?	14
Vouchers: Are Private Schools in the Public Good?	15
Whole-School Reform: Greater Than the Sum of Its Parts?	16
Further Reading	17
2. Behind the Scenes in the World of Education Research	18
The World of Education Research	18
The Worldviews of Researchers	19
Research Methodologies	20
The Purposes of Research	21

Who Does Education Research?	22
Who Pays for It?	23
Where Is It Published?	24
Can You Trust Education Research?	25
What Does the Future Hold for Education Research?	27
Does Education Research Really Matter?	29
Further Reading	30
3. The Causal Question: Does It Work? (Part I)	32
The Causality Conundrum	33
Simple (Minded) Methods of Establishing Causality	34
The Before-and-After Approach	35
The Comparison Group Approach	36
Internal Validity	37
The Elements of an Experiment	38
Why Random Assignment?	38
Units of Randomization	40
Defining the Treatment, Outcomes, and Sample	41
What Is the Treatment?	41
What Are the Outcomes?	42
What Is the Sample?	43
Analyzing Experimental Results	44
What Can Go Wrong With Experiments?	45
Why Are Experiments So Unpopular With Education Researchers?	46
Does Class Size Reduction Work?	48
Does Phonics Instruction Work?	49
Do Private-School Vouchers Work?	50
Does Whole-School Reform Work?	51
Further Reading	52
4. The Causal Question: Does It Work? (Part II)	54
Quasi-Experiments and Non-Experiments	55
What They Are <i>Not</i>	55
What They <i>Are</i>	56
The Researcher's Bag of Tricks	57
Design	57
Statistics	59
Quasi-Experimental Approaches	61
Matching	61
Interrupted Time Series	63
Bad Quasi-Experiments	63
Non-Experimental Approaches	64

Correlational Studies	64
“Natural” Experiments	66
Bad Non-Experiments	67
Does Class Size Reduction Work?	69
Does Phonics Instruction Work?	70
Do Private-School Vouchers Work?	71
Does Whole-School Reform Work?	72
Further Reading	73
5. The Process Question: How Does It Work?	75
What Is Qualitative Research?	76
The Qualities of Qualitative Research	77
Naturalistic	78
Descriptive	78
Focused on Meaning and Explanation	78
The Power of Qualitative Research	79
Qualitative Research Methods	80
Interviewing	80
Observing	81
Analyzing Documents	82
From Whence Comes the Quality in Qualitative Research?	83
How Does Class Size Reduction Work?	86
How Does Phonics Instruction Work?	87
How Do Private-School Vouchers Work?	88
How Does Whole-School Reform Work?	89
Further Reading	90
6. The Cost Question: Is It Worthwhile?	91
The Concept of Costs	92
The Ingredients Method of Cost Analysis	94
Identifying Ingredients	94
Valuing Ingredients	96
Analyzing the Distribution of Costs	97
Aren’t Budgets Good Enough?	98
A Cost Analysis Caveat	99
Two Important Cost Questions	100
Is It Cost-Feasible?	100
Is It Cost-Effective?	101
Why Does This Matter?	103
Is Class Size Reduction Worthwhile?	105
Is Phonics Instruction Worthwhile?	106
Are Private-School Vouchers Worthwhile?	107
Is Whole-School Reform Worthwhile?	108
Further Reading	109

7. The Usability Question: Will It Work for Me?	110
Will it Work in My Setting?	111
Students	112
Settings	112
Treatments	113
Outcomes	114
Some Rules of Thumb for Making	
Generalizations	115
Surface Similarity	116
Ruling Out Irrelevancies	116
Making Discriminations	117
Interpolation and Extrapolation	117
Causal Explanation	118
Research Reviews and Meta-Analysis	119
Special Considerations for Qualitative	
and Cost Studies	120
Qualitative Studies	120
Cost Studies	121
Making Trade-Offs	122
Will Class Size Reduction Work for Me?	124
Will Phonics Instruction Work for Me?	125
Will Private-School Vouchers	
Work for Me?	126
Will Whole-School Reform Work for Me?	127
Further Reading	128
8. The Evaluation Question:	
Is It Working for Me?	129
What Is User-Driven Research?	130
The Causal Question: Is	
It Working for Me?	132
The Process Question: How Is	
It Working for Me?	132
The Cost Question: Is It	
Worthwhile for Me?	133
User-Driven Research at Lincoln	
Middle School	134
Middle School: Panacea or	
Pandora's Box?	134
Adopting the User-Driven	
Research Mind-Set	135
Asking the Right Questions	137
Question Number One: Is the Middle	
School Model Working for Us?	137
What Does the Research Say?	137

Analyzing Achievement Test Data	138
Question Number Two: How Is the Middle School Model Working (Or Not Working) for Us?	139
Surveying the Faculty	139
Interviewing the Faculty	141
Interviewing Students and Parents	142
Question Number Three: Is the Middle School Model Worthwhile for Us?	143
Counting the Costs	143
Cost Effective?	143
Refocusing on Outcomes	143
Defining the Problems	144
Exemplars of User-Driven Research	145
Inquiry for School Improvement: The Accelerated-School Model	145
Closing the Literacy Gap: The Reading Apprenticeship	147
Teachers as Staff Developers: East Side Community High School	148
Sustaining School Improvement: The Professional Learning Community	149
Further Reading	150
Resource: Bibliographies for Case Studies	151
Class Size Reduction	151
Phonics Instruction	152
Private-School Vouchers	154
Whole-School Reform	155
References	157
Index	170
