

Co-op/Intern Spotlight

Clint

As a Standard Work Instruction Technical Intern at Viking Pump, Inc., Clint worked with operators to document and establish Standard Work Instructions for day-to-day tasks. Viking Pump, Inc. builds a wide variety of special pumps that no one else produces. Another task Clint was responsible for was working with outside vendors to get quotes on equipment and the design of the equipment installation work area.

Through this experience Clint was able to apply the things he learned in class while gaining worthwhile experience that will help him future careers. He also learned project management skills.

Clint really enjoyed his experience at Viking Pump, Inc. and would recommend them as a place to complete co-op experience. "It was a great place to work and they are willing to give you the opportunity to do a variety of tasks. You are able to expand outside of regular tasks and get a feel for everything that they offer."
