

Co-op/Intern Spotlight

Principal

Nan

Since 2004, Nan Jungaturapit has participated in many internships and co-op experiences. One of her co-ops was with Principal Financial Group where she worked since summer, 2006. Nan's role in the business's day-to-day activities increased throughout the time she was there. Nan's position required her to complete calculations and process transactions to create and maintain computerized retirement plan records for customers. She was also responsible for calculating accurate earnings based on investment elections and changes on record for specific transactions.

Nan believes that the greatest benefit from doing the Co-op/Internship program is that she now knows how businesses operate and she has gained access to the real world. She has learned how to work hard under the pressure of deadlines. Furthermore, her opportunities have opened new horizons within the business world.

With all the experience that Nan has gained, she feels that she now has a well developed resume and is ready to be accepted into the business world full time.

Major at UNI:

Economics/Finance

Location:

Cedar Falls

Organization:

The Principal Financial Group

An astonishing amount of experience looks good on a resume
