

## Using a partner, discuss:

- How will the video support a unit objective - what is that objective?
- How will it support one of the "components" of standard 6?  
(inquiry, collaboration or interaction in the classroom)
- What is the purpose of the video?  
(instructional, motivational, persuasive, simulation, etc.)
- Will it be a teacher production or student production?
- What challenges do you anticipate?
- What materials have you discovered so far?
- What do you still need to find or create?
- What resources will you use to acquire those things?
