## IJAS Annual Meeting Competition Judging Form—Posters

| Student Name: | Grade: | ence in age levels of the presenters. Make allowances for the normally expected differences in maturity and background. Total of XX Points are possible. You may provide comments under each question or on a separate page. Your comments help students improve! RETURN THIS FORM TO THE STUDENT PROGRAMS CHAIR. |  |  |
| :---: | :---: | :---: | :---: | :---: |
| SCIENTIFIC THOUGHT | Please Circle One |  |  |  |
| Is the problem clearly stated? | The problem statement illustrates that the student understands the problem and communicates this clearly. <br> 3 points | The student communicates most but not all aspects of the problem. <br> 2 points | The problem statement is unclear or illustrates that the student does not have a clear grasp of the problem. <br> 1 point |  |
| Is the hypothesis clearly stated? | The hypothesis is clear and related to the stated problem. <br> 3 points | The stated hypothesis is unclear or unclearly related to the problem. 2 points | The hypothesis is not stated or the stated hypothesis is unrelated to the question. <br> 1 point |  |
| Sub-TOTAL |  |  |  | 16 |
| EXPERIMENTAL METHODS |  |  |  |  |
| Is the description of the procedures complete? | The procedures clearly describe all steps, what will be done and what materials will be used. 3 points | The procedures describe most of what will be done and most of the materials used. 2 points | Several key steps are missing or no materials are mentioned. <br> 1 point |  |
| Is the experiment well designed for the problem described? | Yes, the methods are closely related to the question. 3 points | No, the methods are unrelated or poorly related to the question. 2 points | There is no experimental method. 0 points |  |
| Are variables clearly recognized and defined? | Yes, variables, including a control or constant are clearly described and defined. 3 points | Some variables are defined well while others are presented but unclearly defined. 2 points | Not all variables are described. <br> 1 point |  |
| Have appropriate safety precautions and/or steps for responsible use of organisms been taken? |  | Yes or this experiment doesn't require special precautions. <br> 1 point | No <br> 0 points |  |
| Are the procedures described likely to result in the collection of meaningful data? |  | Yes, the procedures lead to the collection of meaningful data. <br> 1 point | No, steps are missing/unclear and likely would not produce the needed data 0 points |  |

| Do the procedures/results describe what data <br> will be collected and how it will be analyzed? | The procedures/results de- <br> scribe what data will be col- <br> lected and how the data will <br> be analyzed. <br> 3 points | The procedures/results <br> vaguely describe the data and <br> how it is analyzed. | The procedures/results de- <br> scribe what data or how the <br> data will be analyzed but not <br> both. <br> 1 point |
| :--- | :---: | :---: | :---: |
| Is enough data presented to sufficiently ad- <br> dress the problem and hypothesis? | 2 points |  |  |

TOTAL

## ANALYTICAL APPROACH

| Are the data organized in a way to facilitate analysis? | Yes, the data are clearly presented in an appropriate graphical/geographical/tabular or other appropriate way. <br> 3 points | The data are presented in an appropriate way, however the execution is confusing or unclear (i.e. perhaps a bar graph is appropriate, however the data is divided into too few or too many bars) 2 points | The representation of the data is inappropriate for analysis or data of this type. <br> 1 point |
| :---: | :---: | :---: | :---: |
| Does the student formulate explanations from the evidence. | The student uses the data and his/her prior knowledge/ research and experience to draw conclusions. <br> 3 points | The student uses some data, prior knowledge, research, and experience to draw conclusions but ignores other evidence introduced during the presentation. 2 points | The student either has no conclusions or the conclusions are very poorly related to the evidence provided in the presentation. <br> 1 point |
| Are the conclusions valid? | Yes, based on the data and other evidence presented, the conclusions are reasonable. 3 points | Some of the conclusions are reasonable. <br> 2 points | No, the conclusions are inconsistent with the evidence. <br> 0 points |

## TOTAL

| You may give 1 point for each of the following elements: | Yes | No |
| :--- | :--- | :--- |
| Is the poster well organized? | 1 point | 0 points |
| Does the poster "stand alone" without the student present to explain elements? | 1 point | 0 points |
| Is the text and graphics sufficiently large to read at $3-4 \mathrm{ft}$ away? | 1 point | 0 points |
| Does the student included examples of possible future research related to the subject. | 1 point | 0 points |
| Does the poster communicate the student's project successfully? | 1 point | 0 points |
