

What Factors Affect Temperature?

Think/Pair/Share

1. **THINK** – Spend a few minutes thinking about factors you think affect temperature. Make a list of what comes to mind.
2. **PAIR** – Choose a partner. Share your lists with one another. Do your lists match? Do you agree/disagree with the factors on your partner's list? Generate a new combined list based on your discussion.
3. **SHARE** – Be prepared to share your combined list with the larger group. Add and subtract to your combined list, if necessary, as others share with the large group.
