Wireless Signup and Registration

Wireless Networking

Registration is no longer required as the system automatically identifies and associated the connected device by CatID credentials.

All Students and Faculty/Staff MUST bring their personal laptop to the Computer Consulting Center (ITTC room 36) regardless of computer platform to have their laptop registered for wireless connectivity here at UNI. This process takes approximately 15 to 30 minutes normally.

You can speed up the process, by having the current operating system and antivirus updates installed before you visit. Students need to have the free [UNI antivirus software](#) [1].

Faculty and staff members wanting their university laptop added should contact their specific technical staff as the colleges and departments have varying setup requirements.
