

Running Client Software from Windows:

October 27, 2009

The remote client software is already installed on any Windows XP Home or Professional system or higher.

From Start Menu:

Start / All Programs / Accessories / Remote Desktop Connection

Note: if you right-mouse-click the Remote Desktop Connections icon you can choose the “Pin to Start Menu” option, then the program will be on your Start Menu.

Alternative Method Using the Start/Run:

Start / Run / **mstsc**

See how to configure this elsewhere in this web space.
