

## Team Research Report

1. Which route did each researcher find to have to lowest total cost?
2. Which route's path was in the best location for travel? Why?
3. Which route would your team choose to build? You must support your decision with a minimum of two reasons for this choice.
4. Why didn't you choose one of the other routes? Discuss this and write down a minimum of one reason that each of the other routes was not the best choice. (You may use the back of the paper if needed).
