

Report of the President

Suggestions Box – Met with Organization and Finance Committee to request funding for the suggestions box. I'm in contact with the unresponsive leader of the student organization that is making it for us, pushing them to finish the box by February 1st.

Paperless Homework – The materials and recycling working group from the Sustainability Action Committee is working towards promoting professors to accept paperless homework. Thanks for all of your suggestions of professors.

Snow Day – Spent the snow day fielding calls asking whether or not the Panther Shuttle would still run. It did.

Safe Ride - Speaking of the shuttle, if you know anyone that left their backpack, car keys, and iphone on the safe ride this weekend, tell them to get in touch with me.

Tabling – Ian and I tabled in the Union on Monday to meet with our constituents and talk to them about NISG. The response has been overwhelmingly positive. We'll be doing it every Monday at noon – tell your friends to stop by and say hi to us! One low note, however, is that due to our resolution requesting that longboarding be allowed on campus, my friend Tom was put in the hospital because he fell off his longboard. He's better now, but be sure to always wear a helmet!

Supreme Court – I've been interviewing applicants to the Supreme Court's Justice and Chief Justice positions.

Committees – Speaker Alfred and I have been meeting with committee chairs and directors to try to draw lines between Executive branch duties and Legislative branch duties, as well as resolve any conflicts that may have held over from last semester.
